

PRIOR AUTHORIZATION CLINICAL NOTE

Medication: Ozempic (Semaglutide)

1. PATIENT DEMOGRAPHICS

Patient ID	23434
Age	29 years
Sex	Female
Number of Pregnancies	10

2. INSURANCE INFORMATION

Insurance Plan	D
----------------	---

3. VITAL SIGNS & LABORATORY MEASUREMENTS

Measurement	Value & Clinical Interpretation
Plasma Glucose (2-hr OGTT)	115.0 mg/dL — Pre-diabetic range
Diastolic Blood Pressure	Not recorded
2-Hr Serum Insulin	Not recorded
Body Mass Index (BMI)	35.3 kg/m ² — Obese (≥30 kg/m ²)

4. DIAGNOSIS

Diabetes Status: **NEGATIVE** — No diabetes diagnosed

5. CLINICAL JUSTIFICATION FOR PRIOR AUTHORIZATION

After reviewing this patient's medical history and diagnostic findings, prescribing Ozempic (semaglutide) is clinically necessary. While this patient does not present with a Type 2 diabetes diagnosis, a BMI of 35.3 kg/m² meets the clinical threshold for obesity (≥30 kg/m²). Ozempic (semaglutide) is indicated for chronic weight management in adults with obesity as an adjunct to a reduced-calorie diet and increased physical activity, and is medically necessary for this patient's care.
